

Total Number of Students Reached: 742

Participation by Program				
Sources of Strength	Marijuana Education Initiative	Brief Interventions	Parent Info Dissemination	LifeSkills Training
742 Students impacted (27 peer leaders)	498 students	2 student	579 families	95 students

The Substance Use Prevention Program uses the Youth National Outcome Measures (Youth NOMs) tool to assess youth responses on substance use behavior, attitudes and perceptions. Providers collected pre-test data at the beginning of ongoing services and post-test data at the end of services. The program summaries reflect the behaviors, perceptions and attitudes where positive change was achieved; if there was no effect, that particular indicator is not named.

Sources of Strength

27 student peer leaders created the following messaging campaigns:

- The Sources of Strength peer leaders presented to all 6th graders via an assembly on the various protective factors promoted through the Sources of Strength program.
- The peer leaders created posters promoting the Sources of Strength program, and displayed them throughout the school.
- Peer leaders led a Trusted Adult Campaign, in which they voted for their four most trusted adults at Hill, and created posters for them. They then presented the teachers with the posters and explained to the teacher that they've been identified as a trusted adult at Hill, and what that means (students may come to them if they are in need of help).

- 95% of students maintained abstinence from pre to post test

Marijuana Education Initiative- Impact and Awareness Prevention Program

This classroom prevention program was taught to 498 students (all 6th and 7th grade students at Hill) and demonstrated the following outcomes:

- 94% of students maintained abstinence from pre to post test
- Reductions in past 30 day use:
 - 56% reduction for alcohol
 - 60% reduction for marijuana

Brief Interventions

- 2 students received the BRRIM (Brief Risk Reduction Interview and Intervention Model) assessment

Info Dissemination

781 Parent Tool Kit Brochures and additional resources were e-mailed to parents of Hill students in May of 2017.

LifeSkills Training Program

This classroom prevention program was taught to 95 students and demonstrated the following outcomes:

- 94% of students maintained abstinence from pre to post test
- Reductions in past 30 day use:
 - 100% reduction for alcohol
