

**Total Number of Students Reached: 143**

### Participation by Program

MEI	Teen Intervene	Other misc. prevention efforts	Signs of Suicide
23 students	4 students	23 students	97 students

The Substance Use Prevention Program uses the Youth National Outcome Measures (Youth NOMs) to measure changes in substance use and perception of harm. Goals include: decreasing current use, decreasing likelihood of future use, and increasing the perception of substances as harmful. Providers collected pre-test data at the beginning of ongoing services and post-test data at the end of services. This includes data from the Marijuana Education Initiative Impact Awareness and Teen Intervene programs.

### MEI and Teen Intervene

75% reduced or quit using substances by the end of the program. Compared to the pre-test, more students were likely to say no to any of the indicated substances in the future.

2018-2019 School Health Professionals Grant Summary: DCIS Montbello

Perception of harm tends to decrease over time as students age. The goal is for students to either increase or maintain their perception of substances as potentially harmful: The perception of harm for all substances increased.

## Signs of Suicide

97 students received the Signs of Suicide prevention program.

## Info Dissemination

Parent Tool Kit Brochures and additional resources were e-mailed to all parents of DCIS Montbello students.
