

Total Number of Students Reached: 686

Participation by Program					
Learning to Breathe	Marijuana Education Initiative	Signs of Suicide	Teen Intervene	Sources of Strength	Gay/Straight Alliance
13 Students	107 Students	215 Students	21 Students	24 peer leaders (343 students impacted)	8 Students

The Substance Use Prevention Program uses the Youth National Outcome Measures (Youth NOMs) tool to assess youth responses on substance use behavior, attitudes and perceptions. Providers collected pre-test data at the beginning of ongoing services and post-test data at the end of services. This includes combined data from Teen Intervene and the MEI Impact Awareness Program.

Teen Intervene and MEI Impact Awareness Programs

A total of 128 students received these programs and demonstrated the following outcomes:

An average of 88% of students who were not using substances at pre-test remained abstinent. Not enough students were using substances at pre-test to provide analysis for past 30 day use.

Perception of harm tends to decrease as students age over time. The goal is for students to either maintain or increase their perception of substances as potentially harmful. Outcome: Students increased their perception of harm for all substances.

In addition, 82% of students agreed with the statement: “I learned new information about the impact of drugs and alcohol on the brain, body and behaviors”. 89% agreed with “I think I will use the information I learned to make decisions in the future about drug or alcohol use”.

Sources of Strength

24 students participated as peer leaders in the Sources of Strength program, and created the following messaging campaigns:

- The Sources of Strength peer leaders completed their first campaign - the Thankfulness Challenge (see photo). They are now working on a short Public Service Announcement about "What Is Sources of Strength?" to show during middle school and high school community meetings. Mr. Stroh has been kind enough to offer to help.
- Sources of Strength participants continue to meet and were able to complete a video and show it on the school news! A small group (4 to 5 students) attended the Sources of Strength summit Monday April 15 at North High 5-7 p.m. to share out about our campaigns and show the video!

BESS Universal Screener

SHPs were responsible for working with their school administration to implement the BESS Universal screener to assess overall behavioral and emotional risk and overall mental health status of students at West Leadership Academy. The BESS is utilized to guide the work of the SHP as well as measure school-wide impact of prevention programming.

School Name: West Leadership Middle (8th only)

BESS Social Emotional Screener - Pre/Post % Comparison 2018-2019

Goal is to increase % Normal and decrease % Elevated and Extremely Elevated

BERI

BERI - Behavior and Emotional Risk (Overall)

WLA data showed a positive increase in students who finished the year in the normal range, while also showing a decrease in the number of students who were experiencing elevated levels of risk.

Info Dissemination

Parent Tool Kit Brochures and additional resources were e-mailed to all parents of West Early College students.
